FIVE RULES FOR ACCURATE MEASURING

- 1 Stand tall and relaxed, feet together, looking straight ahead.
- 2 Wear fitted clothing or the undergarments you will wear with the final piece.
- 3 Keep the tape snug and level, never tight. Slide one finger under it.
- 4 Measure twice. Record the number, not the guess.
- 5 Have someone else take the measurements. Do not measure yourself.

SECTION 02

Measurement Guide

Numbers on the diagrams match the numbers in the table that follow. Dashed lines show length measurements.

SECTION 03

Upper Body

Record each measurement at every fitting so changes are easy to see.

UNIT ☐ cm ☐ inches

NO.	MEASUREMENT	HOW TO MEASURE	FITTING 1	FITTING 2	FITTING 3
01	Height	Barefoot, back to wall, head level. Floor to crown.			
02	Shoulder	Across the back, shoulder point to shoulder point.			
03	Bust / Chest	Around the fullest part, tape level across the back.			
04	Under Bust	Around the ribcage directly beneath the bust.			
05	Waist	Around the natural waist, the narrowest point.			
06	Hip	Around the fullest part of the hips and seat.			
07	Armhole	Around the arm at the underarm, over the shoulder point.			
08	Sleeve Length	Shoulder point to wrist bone, arm slightly bent.			
09	Bicep	Around the fullest part of the upper arm, relaxed.			
10	Wrist	Around the wrist bone, one finger of ease.			
11	Neck	Around the base of the neck, one finger of ease.			
12	Back Length	Nape (base of neck) down to the natural waist.			
13	Front Length	Shoulder-neck point over the bust to the waist.			

NOTES

SECTION 04

Lower Body & Custom

Length measurements are taken from the natural waist. Note whether you want the garment sitting high, natural, or low.

UNIT ☐ cm ☐ inches

FINAL PAGE

Before Production Begins

Please confirm every measurement with your fashion professional before any fabric is cut.

This sheet is a personal record and a starting point. It supports a professional fitting; it does not replace one.

- 01 Bodies change.**
Weight, posture, pregnancy and even the time of day can shift a measurement. Re-measure if more than a few weeks pass before production.
- 02 Methods differ.**
Every tailor and designer has a preferred way of measuring. Your professional will translate these numbers into their own pattern.
- 03 Fabric and style matter.**
Ease, stretch, lining and construction all change how a measurement becomes a finished garment.
- 04 Fittings catch problems early.**
A mock-up or first fitting is far cheaper than a remake.
